Profile Summary

Aspiring software engineer with a strong foundation in Python, Java, data science, and machine learning. Experienced in analyzing complex datasets, developing predictive models, and applying AI techniques to real-world problems. Eager to expand into web development, with growing skills in building scalable web applications and APIs. Passionate about combining AI/ML with web technologies to create innovative, data-driven solutions that drive efficiency and enhance user experiences. Proactive, adaptable, and committed to continuous learning in the evolving tech landscape.

Education

B.Tech/B.E., 2026

National Institute of Science and Technology,
Berhampur

12th, 2022

Odisha, Oriya

10th, 2020

Odisha, Oriya

Internship

1 Months

Summer training program: Data Science using Python
National Institute of Science and Technology (NIST)

Utilized Python and key libraries (NumPy, Pandas, Matplotlib) to perform data analysis and visualization.

Focused on customer churn analysis, applying advanced data wrangling techniques to extract insights.

Developed predictive models to forecast churn behavior, improving decision-making processes.

Enhanced skills in data preprocessing, feature engineering, and machine learning model development.

Certification

- Odia
